Steve, just to be clear. We did not report the Isotech and Radiological data yet.

Steve,

we reported all data to the residents, including non-detects. Yes, only the first week (11 homes) is available to the public at the moment.

Rich

Subject: Dimock Results

Rich,

What criteria did EPA use when reporting results to the residents of Dimock? Based on EPA's spreadsheet, EPA/DEP primary and secondary MCLs for drinking water were used and

also EPA "trigger" levels. Did you also report to the residents any laboratory detects in the water? What about Pennsylvania Statewide Health Standards for groundwater from PA Code Title 25 Chapter 250? Also, it is my understanding that only the first week's worth of data has been publicly released so far. Is this correct?

Thank you,
